

Well maintained and fully repaired used machines for the Pharmaceutical Industry are a viable alternative to expensive new equipment with long delivery times.

We are proud to have been supplying the Pharmaceutical Industry world-wide for more than 35 years. Qualified staff and our long experience ensure that our clients receive machines, which are technically in excellent order and which can be installed immediately.

We are always happy to assist in the selection and procurement of machines most appropriate to our customers' requirements.

Our machine stores are clean and well-lit and all machines are accessible for inspection. Our works are easily reached by car or public transport.

**pharma maschinen** was founded in 1984. Our offices, large showroom and fully equipped workshop are in Kreuzau / Düren near Cologne and Düsseldorf.

In our stores with approx. 4,000 m<sup>2</sup> we exhibit over 600 processing and packaging machines. Most machines can be seen running under power and we can often demonstrate machines with customers' product or packaging materials.

We share a common interest in optimizing your production and have therefore established the trade association **retrofit alliance** consisting of Pharma Maschinen and ACSR-Solutions to ensure that your equipment is professionally organized.

Your Benefits:

- Well maintained used pharmaceutical machines are often a viable alternative to new equipment with high costs and long delivery times
- Used pharmaceutical machinery allow a calculated risk for your capital investment
- We have been suppliers of pharmaceutical machines to the Pharmaceutical Industry world-wide for more than 30 years
- We exhibit more than 600 pharmaceutical machines produced by major European manufacturers
- As a member of a trade association, we supply products and machinery as a whole
- We assist our customers in finding appropriate machinery
- Renewal of machines depending on customers' requirements and according to manufacturer's specifications. If required, we provide set-up and qualification in customers' facilities
- retrofit alliance offer after-sales-services, calibration, supply of spare parts and a remote maintenance of pharmaceutical machinery with new automatization
